PROPOSED PACKAGING DESIGN OF TEIKIN UNIVERSAL LINERS

THE BETTER QUALITY **CYLINDER LINERS**

EIKIN

UNIVERSAL LINERS

THE BETTER QUALITY CYLINDER LINERS

- HIGH CARBON SUPER DUCTILE **CAST IRON MATERIAL**
- SELF-LUBRICATED BY FLAKE **GRAPHITE MICROSTRUCTURE**
- MAXIMIZE ENGINE POWER OUTPUT

www.teikin.com

SEMI-FINISHED (SF) LINERS

INNER DIAMETER 70.20 MM

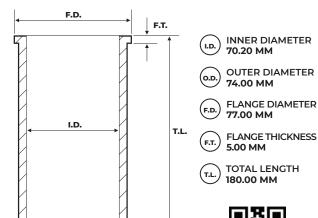

OUTER DIAMETER

TOTAL LENGTH

PART NUMBER: LSFA071.0

REFERENCE NO: 071.0SF

SUITABLE FOR : 71.00 MM

4202

MADE IN INDONESIA

SUITABLE FOR ALL TYPES OF INTERNAL COMBUSTION ENGINES

ALL GASOLINE / **MULTI-FUEL SPARK IGNITION ENGINES**

ALL DIESEL / **MULTI-FUEL COMPRESSION IGNITION ENGINES**

UNIVERSAL LINERS

- Teikin Universal Liners are custom made from high carbon super ductile cast iron alloy able to withstand extreme pressure and heat.
- Manufactured with the latest technology of roto-casting, Teikin Universal Liners' microstructure are guaranteed to have 85% minimum Type-A graphite providing selflubrication to the running surfaces for piston rings to glide on. This ensures that oil consumption is kept to an absolute
- Precise honing of Teikin Universal Liners enable ideal sealing of the combustion chambers making it possible for engines to pump out the maximum power as per their original design.
